About This Game

The author of this game is a guitar player and he likes [Guitar Hero] series very much.

"A guitar music rhythm game for Steam ? Sounds not bad !"
Then the author started to learn C# , game engines , finally the game is made.

KeyBoard Guitar Master is a guitar music rhythm game includes 14 original old school rock songs.

Only using Up Down Left Right arrow keys to strike notes, even people whom do not good at rhythm games still can enjoy this one.

You don't need a guitar controller , there will be much more fun if you try to hold the keyboard as holding a real guitar when you're playing.

You can only shoot bolts when you're standing, and have to melee when you jump\duck\look up? Can't they just separate the melee and ranged attacks to different buttons? Just assign them each to a button (X and B on a controller, which both do the same thing at the moment) and problem solved. How hard is it?

Also, you can't attack when double-jumping, while there are plenty of respawning, floating enemies. I found this out after only 5 minutes into the game.

What the hell is this BS? Refunded.. I definitely recommend this DLC. It has lots of cool characters and vehicles. Overall, I like this pack better than Classic Space.. No Mouse support. All actions and menus are controlled with keys. Enter is F, Cancel is D but you use this also for the attacks of the party members. The game requires quick hacking of several keys in order to control the actions of the party members. Too fast for me to enjoy and use strategy. No pausing, no slowing down of speed possible.. Wow. 14 minutes long. You guys really knocked it out of the park on this one. What a game! The graphics almost cover up how the dev team didn't even try.. Rescue quest is a match 3 game similar to a lot of other games.

What it does different is that you have different goals and spells.

The game is well done. The port from mobile is good, graphics are nice, overall quality is good if not great.

For me this match 3 game has been very good. I like how much content it has. Lots of different spells, enemies, keys. There are more than enough levels and new content pops out pretty often.

I do recommend this for 10\$. Not bad for a rpg maker game, it is actually a fun game.. Good Game overall. Inferior to Yakuza Zero by any means sadly, but if you enjoyed the Story in Zero, you should definitely get this one as well. Can't really go wrong with spending 20 bucks on a continuation on the Yakuza Story

This Game shows a lot of potential I know this not only from playing it but because I have made games on Unity before and if the developer listens to the people then items in the game can be changed quickly if you complain about it. I would for now put this game at a 4 in that it is a solid game with lots of improvement that can be added to make it a super strong game.

As to the gamemaker you should make a zombie survival single player campaign like Dying Light or the new Nightmare Zombies mode in Black Ops 3. As that would make a great new game

Thanks to the new update I have to add some updates to my review. The new map is good but the old one was OK there should be 2 maps but I recommend this game now and the rating is a 4. My wife is ♥♥♥♥ing hot (I hope so). I find this game very frustrating, frustrating enough that I keep coming back to play it. Very enjoyable with simple gameplay but makes you think about your timing. Great little game for the price

. There is nothing quite as fun as gathering friends and/or family and have a go at comedic trivia that's also pretty clever at times, and seeing who can understand what they are asking about. So many good times.... It's really a shame, this game had potential but the way it was executed ruined it. The game was more frustrating than fun and the reason being:

- grinding excessively
- crafting new weapons and building your base to the max could have been fun if it was easier to find specific items and not just have things randomly drop from enemies or chest/breakable object.
- The map rearranges itself everytime you die or quit the game.
- This game needed a simple Castlevania back dash to avoid enemy attack but instead you're given a forward dash which only helps you progress faster through the room.
- most of the main and side missions were about finding items, certain missions also required me to find blueprints and upgrade.
- Certain doors/shafts are locked which require a key to open them but if you die the map rearranges itself, forcing you to find the key again.

It's been a while since I encountered a game that truly blew me off, I should have stopped playing after 2 hours but I gave it too much of a chance.. The game crashed twice as I was attempting to enter the Terrace location. Besides, the prologue is vaguely racist. I do not recommend this game.. I played this and it amazes me. the characters, the story mode, the stages, the music.
man. 10/10

also why isn't the soundtrack on Steam Mr. Dan?. This is pretty awesome.

At least in the tutorial you feel incredibly powerful; it slacks off a little bit but the game is awesome.

I'll extend my review after I've played more, but so far so good; really enjoying this.

There have been lots of 'omg too cool' moments.. Cutscene animations may not be the best, but the storyline is thrilling indeed.
